

Predicates highlighted in pink are those discussed by Korotkova & Anand (2024); predicates in bold are those with an imminency reading.

Rating scales:

White and Rawlins's (2018) participants answered the question 'Did that thing happen?' (CC: 'a particular thing happened') by choosing 'no', 'maybe or maybe not' or 'yes'. These ratings were recoded as -1, 0 and 1, respectively.

Ross and Pavlick's (2019) participants provided ratings on a 5-point Likert scale ranging from -2 (the CC is 'definitely not true') to 2 ('definitely true'). These ratings were rescaled to range from -1 to 1.
